SUMMARY

Dedicated Full Stack Web Developer and recent Computer Science graduate from **Florida Atlantic University** with **4+** years of experience building responsive and scalable web applications. Proficient in **React.js**, **Node.js**, JavaScript, **TypeScript**, and **AWS**. Skilled in performance optimization, modular design, RESTful API integration, and Agile collaboration. Committed to writing clean code and delivering excellent user experiences.

WORK EXPERIENCE

Full Stack Developer, 6D Technologies

Nov 2021 - Aug 2023

- Built scalable telecom platforms (Vi, Mobitel, Jio) using React.js, Next.js, TypeScript, JSON, and CSS.
- Translated workflow diagrams and Figma/Adobe XD designs into functional responsive UIs.
- Managed async API flows and JSON payloads with Axios, async/await, and Redux Thunk.
- Optimized DMS APIs with Node.js, Express.js, and SQL by architecting database relationships.
- Created and deployed telecom APIs using Docker and GitLab CI/CD pipelines.
- Managed microservices on Kubernetes clusters in AWS Cloud, ensuring scalability and reliability.
- Troubleshoot application issues using analytical skills to identify root causes and deliver fixes.

Software Engineer, Cognizant Technology Solutions

Apr 2020 - Nov 2021

- Developed insurance platform UIs with React.js, Redux, Next.js, TypeScript, JSON, and CSS.
- Built reusable hooks and modular components for 10+ ServiceNow portal modules.
- Improved performance with lazy loading, memoization, and code-splitting, reducing load time 30%.
- Developed RESTful APIs with Node.js and Express.js, integrating external APIs and JSON payloads.
- Created formal test cases using Jest and React Testing Library, improving coverage by 35%.
- Participated in Agile ceremonies and sprint demos, showcasing progress and gathering feedback.
- Diagnosed and resolved issues quickly by applying problem-solving and analytical skills.

Software Engineer Intern, Groundhog Apps

Mar 2019 - Sep 2019

- Assisted in developing React.js applications by building reusable components and implementing hooks for state.
- Contributed to improving UI/UX through responsive design, performance optimization, and API integrations.

PROJECTS

LMS (Library Management)

- Built a full-stack app using React and Node/Express.js, replicating core features of college's librarian-managed system.
- Added book issue/return, fine calculation for overdue books, and renewal options, handled solely by the librarian.

TAOVIX (TA Management System)

- Developed role-based frontend interfaces for TA workflows using React.js and Redux across four user roles.
- Built and maintained RESTful APIs with Node.js, Express, and MongoDB, implementing JWT authentication to securely manage access for all user roles and delivering agile-driven feature updates

SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Redux, React Router v6, React Hooks, Next.js, Node.js, Express.js, Flask, JSON, Material UI, Python, jQuery, Ajax, HTML5, CSS3, NODE-RED

Tools & Platforms: Docker, Kubernetes, AWS, GitLab CI/CD, Babel, Webpack, Npm, VS Code, Jira, axios

Databases & Performance Monitoring: SQL, MongoDB, Cypress, Jest, Dynatrace, Agile, Scrum

CERTIFICATIONS

- JavaScript Foundations Professional **Certificate by Mozilla**
- Frontend Developer (React) Certificate by Hacker Rank

EDUCATION

Florida Atlantic University, Boca Raton, FL

Aug 2023 – May 2025

Master of Science, Computer Science

Jawaharlal Nehru Technological University, Anantapur, AP

May 2016 – Apr 2020

Bachelor of Science, Engineering | Electronics & Communication
